

How's your hearing?

Hearing loss tends to happen gradually. So it can be hard to tell whether your loss is negligible, mild or pronounced.

This simple written test will give you a good idea of how well you're hearing – and whether you'd benefit from a professional hearing test.

Using the scale below, please indicate the degree of difficulty you have hearing in the following situations.

	NO DIFFICULTY	SOME DIFFICULTY	GREAT DIFFICULTY
1. Listening to the TV at home	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. In the bank/at the shops	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Talking with one other person in a quiet room	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Having a conversation in a group (e.g. with several family members or friends)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Having a conversation on the telephone	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. In a crowded bar/restaurant	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If you answered “Some difficulty” or “Great difficulty” to two or more of these questions, we recommend you should visit a professional audiologist to have your hearing assessed.
